Go to My Selling Tools

Click to Setup API

Click on Request API Credentials

The screenshot shows the PayPal API Access page. At the top right, there are links for 'Log Out', 'Help', and 'Safety Advice', along with a search box. The main navigation bar includes 'My Account', 'Send Money', 'Request Money', 'Merchant Services', 'Auction Tools', and 'Products & Services'. Below this, there are sub-links for 'Overview', 'Add Funds', 'Withdraw', 'History', 'Resolution Centre', and 'Profile'. The 'API Access' section is highlighted, with a 'Back to My Profile' link. The text explains that an API allows PayPal software to communicate with an online shop or shopping cart. Under 'Setting up API permissions and credentials', there are two options. Option 1 is for granting permissions to a third party. Option 2 is for requesting API credentials to create your own API username and password. A yellow callout box with a green arrow points to the 'Request API credentials' link in Option 2. Below the options, there is a section for 'Accept payments from your online shops before setting up APIs' and a 'Questions?' section.

[Overview](#) | [Add Funds](#) | [Withdraw](#) | [History](#) | [Resolution Centre](#) | [Profile](#)

API Access [Back to My Profile](#)

An API (Application Programming Interface) allows PayPal software to communicate with your online shop or shopping cart.

Setting up API permissions and credentials

Choose one of the following options to integrate your PayPal payment solution with your online shop or shopping cart.

Option 1 - Grant API permissions to a third party to use certain PayPal APIs on your behalf.

Choose this option if:

- You are using a pre-integrated shopping cart, hosted by a third party
- Your website is hosted and managed by a third-party service provider

[Grant API permission](#)

Option 2 - Request API credentials to create your own API username and password.

This option applies to:

- Custom websites and online shops
- Pre-integrated shopping carts running on your own server

[Request API credentials](#)

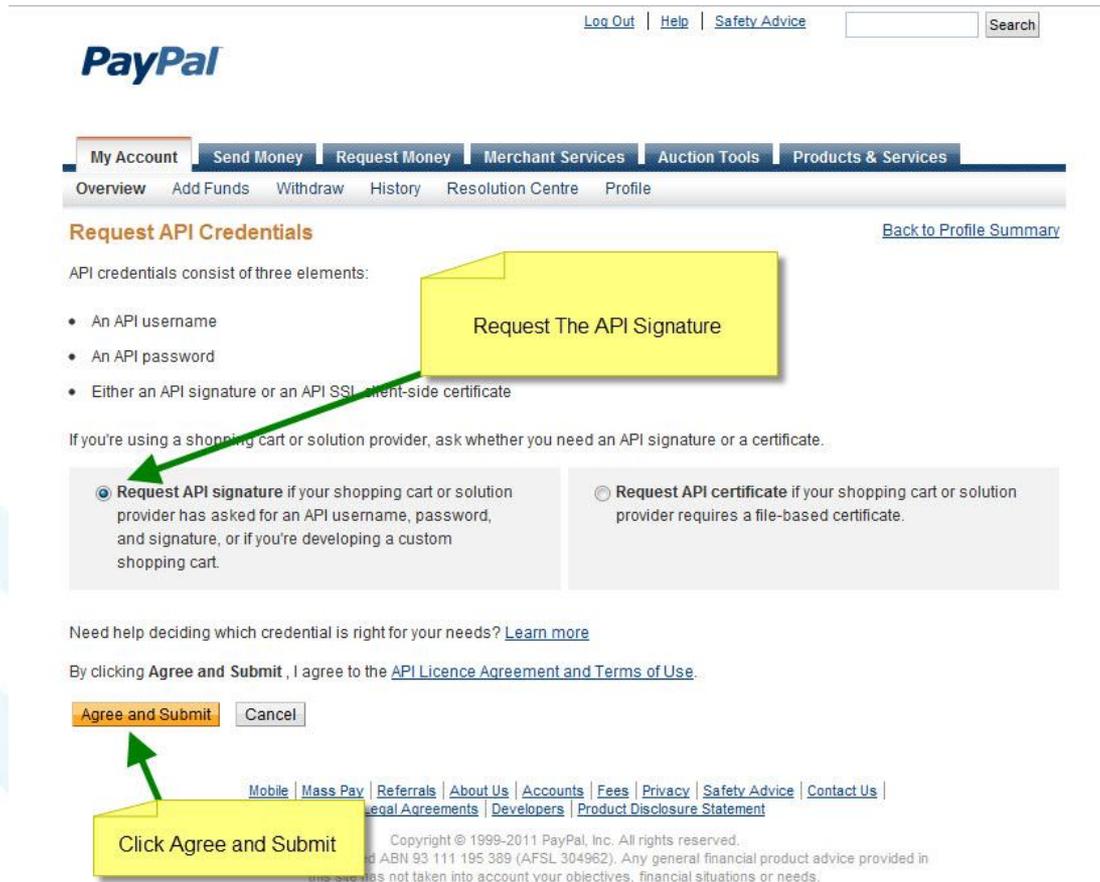

Accept payments from your online shops before setting up APIs

[Enable PayPal Express Checkout](#) to accept payments from your online shops right away. You can set up APIs later.

Questions?

If you're not sure about setting up APIs, ask your shopping cart provider or website developer. [Learn more](#) about PayPal API concepts and terminology.

Click on Request the API Signature and Click Agree and Submit

The screenshot shows the PayPal 'Request API Credentials' page. At the top right, there are links for 'Log Out', 'Help', and 'Safety Advice', along with a search box. The main navigation bar includes 'My Account', 'Send Money', 'Request Money', 'Merchant Services', 'Auction Tools', and 'Products & Services'. Below this, a sub-navigation bar lists 'Overview', 'Add Funds', 'Withdraw', 'History', 'Resolution Centre', and 'Profile'. The page title is 'Request API Credentials' with a 'Back to Profile Summary' link.

The main content area states: 'API credentials consist of three elements:'

- An API username
- An API password
- Either an API signature or an API SSL client-side certificate

Below this, a text block says: 'If you're using a shopping cart or solution provider, ask whether you need an API signature or a certificate.'

There are two radio button options:

- Request API signature** if your shopping cart or solution provider has asked for an API username, password, and signature, or if you're developing a custom shopping cart.
- Request API certificate** if your shopping cart or solution provider requires a file-based certificate.

Below the options, there is a link: 'Need help deciding which credential is right for your needs? [Learn more](#)'

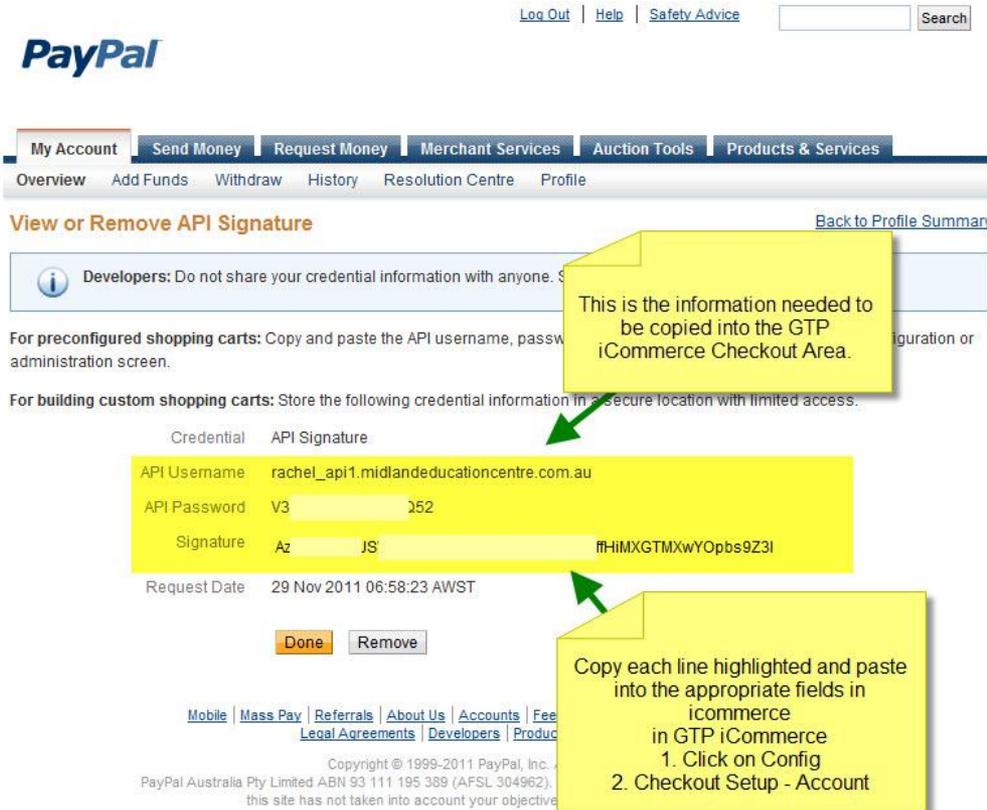

Then, a text block says: 'By clicking **Agree and Submit**, I agree to the [API Licence Agreement and Terms of Use](#).'

At the bottom, there are two buttons: 'Agree and Submit' (highlighted in orange) and 'Cancel'. A yellow callout box with the text 'Click Agree and Submit' has a green arrow pointing to the 'Agree and Submit' button.

At the top of the page, a yellow callout box with the text 'Request The API Signature' has a green arrow pointing to the 'Request API signature' radio button option.

At the bottom of the page, there is a footer with links: 'Mobile', 'Mass Pay', 'Referrals', 'About Us', 'Accounts', 'Fees', 'Privacy', 'Safety Advice', 'Contact Us', 'Legal Agreements', 'Developers', 'Product Disclosure Statement'. Below these links is the copyright notice: 'Copyright © 1999-2011 PayPal, Inc. All rights reserved. ... and ABN 93 111 195 389 (AFSL 304962). Any general financial product advice provided in ... has not taken into account your objectives, financial situations or needs.'

Copy the API Username, password and Signature text into the GTP CMS.

The screenshot shows the PayPal 'View or Remove API Signature' page. A yellow box highlights the API Username, Password, and Signature fields. A callout box points to this information, stating it is needed for the GTP iCommerce Checkout Area. Another callout box points to the highlighted fields, instructing the user to copy each line and paste it into the appropriate fields in iCommerce, specifically in the 'Config' and 'Checkout Setup - Account' sections.

Return to PayPal after Copying and Saving Credentials and Click Done

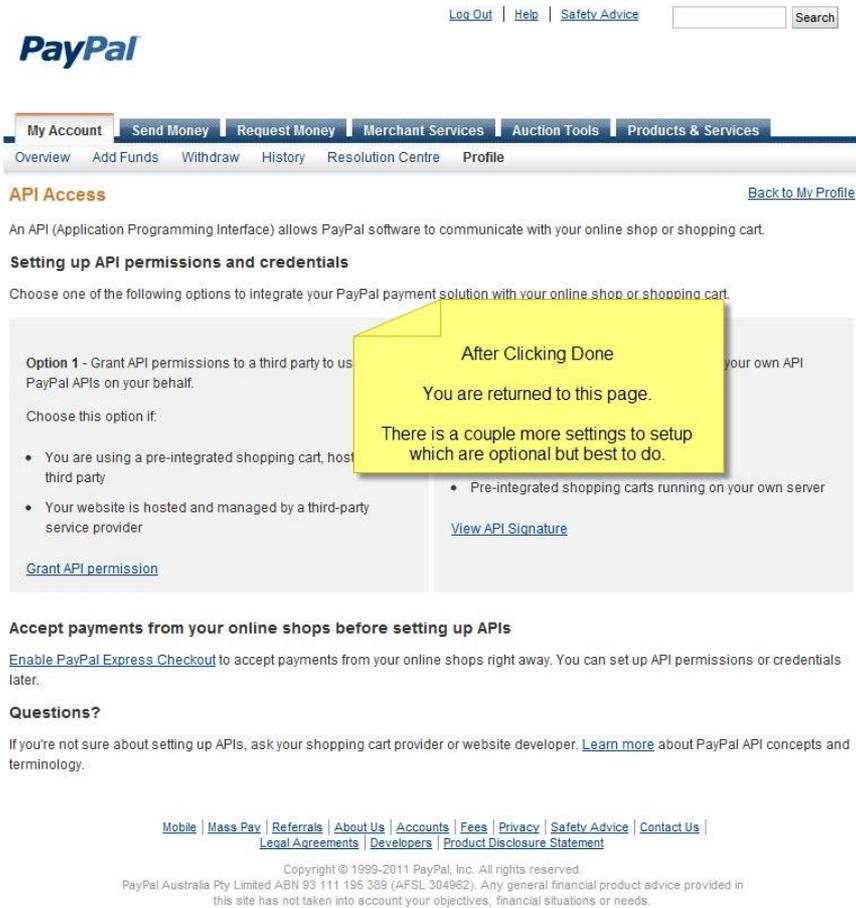

The screenshot shows the PayPal 'View or Remove API Signature' page. At the top, there are links for 'Log Out', 'Help', and 'Safety Advice', along with a search box. Below the PayPal logo is a navigation bar with tabs for 'My Account', 'Send Money', 'Request Money', 'Merchant Services', 'Auction Tools', and 'Products & Services'. Under 'My Account', there are sub-tabs for 'Overview', 'Add Funds', 'Withdraw', 'History', 'Resolution Centre', and 'Profile'. The main heading is 'View or Remove API Signature' with a 'Back to Profile Summary' link. A warning box states: 'Developers: Do not share your credential information with anyone.' Below this, there are instructions for preconfigured and custom shopping carts. A table of credentials is highlighted in yellow:

Credential	API Signature
API Username	rachel_api1.midlandeducationcentre.com.au
API Password	V3 [redacted] 252
Signature	Az [redacted] JS [redacted] #HIMXGTMXwYOpbs9Z3I
Request Date	29 Nov 2011 06:58:23 AWST

At the bottom of the table are 'Done' and 'Remove' buttons. A blue arrow points from the text 'Click Done' to the 'Done' button. Two yellow callout boxes provide instructions: one points to the table with the text 'This is the information needed to be copied into the GTP iCommerce Checkout Area.', and another points to the highlighted table with the text 'Copy each line highlighted and paste into the appropriate fields in icommerce in GTP iCommerce 1. Click on Config 2. Checkout Setup - Account'. At the bottom, there are links for 'Mobile', 'Mass Pay', 'Referrals', 'About Us', 'Accounts', 'Fees', 'Legal Agreements', 'Developers', and 'Products'. Copyright information for PayPal is also visible at the bottom.

Back in PayPal After You Have Clicked Done.

The screenshot shows the PayPal user interface for API Access. At the top, there are links for [Log Out](#), [Help](#), and [Safety Advice](#), along with a search box. The main navigation bar includes [My Account](#), [Send Money](#), [Request Money](#), [Merchant Services](#), [Auction Tools](#), and [Products & Services](#). Below this, a sub-navigation bar has [Overview](#), [Add Funds](#), [Withdraw](#), [History](#), [Resolution Centre](#), and [Profile](#).

API Access [Back to My Profile](#)

An API (Application Programming Interface) allows PayPal software to communicate with your online shop or shopping cart.

Setting up API permissions and credentials

Choose one of the following options to integrate your PayPal payment solution with your online shop or shopping cart.

Option 1 - Grant API permissions to a third party to use your own PayPal APIs on your behalf.

Choose this option if:

- You are using a pre-integrated shopping cart, hosted by a third party
- Your website is hosted and managed by a third-party service provider

[Grant API permission](#)

Option 2 - Pre-integrated shopping carts running on your own server

[View API Signature](#)

After Clicking Done
You are returned to this page.
There is a couple more settings to setup which are optional but best to do.

Accept payments from your online shops before setting up APIs

[Enable PayPal Express Checkout](#) to accept payments from your online shops right away. You can set up API permissions or credentials later.

Questions?

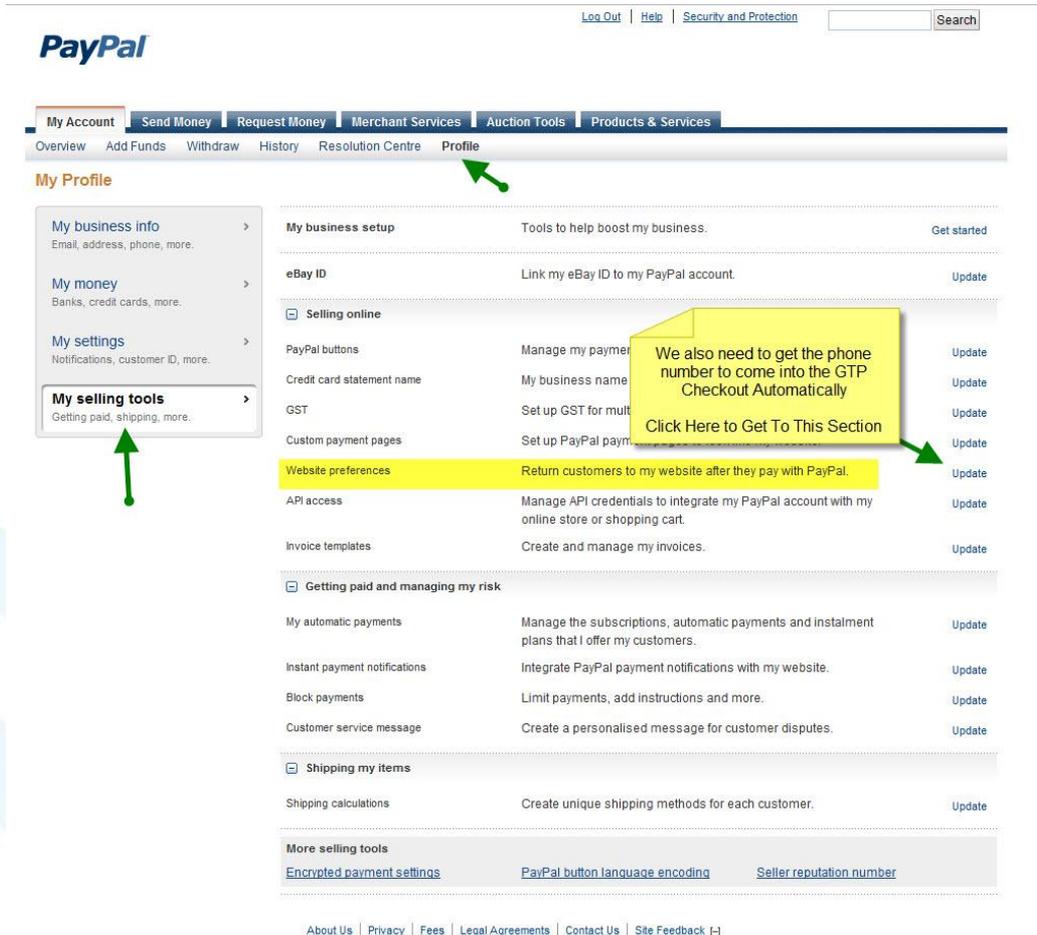

If you're not sure about setting up APIs, ask your shopping cart provider or website developer. [Learn more](#) about PayPal API concepts and terminology.

Switch Phone Number to On (Required) and Save

payments from non-encrypted ones.

[Learn more about Encrypted Website Payments](#)

Note: If you enable Encrypted Website Payments, all of your Buy Now, Donations and Subscriptions buttons **must** be encrypted via one of the following methods:

Using the [Button Factory](#) with the security settings enabled.

Using your own code, you encrypt all website payments before sending them to PayPal.

By enabling this feature, any Buy Now, Donation or Subscription button that is not encrypted will be rejected by PayPal.

Block Non-encrypted Website Payment: On Off

PayPal Account Optional

When this feature is turned on, your customers will go through an optimized checkout experience. This feature is available for Buy Now, Donations and Shopping Cart buttons, but not for Subscription buttons. [Learn More](#)

PayPal Account Optional: On Off

Contact Telephone Number

When you activate this option, your customers will be asked to include their phone number with their payment information. [Learn More](#)

Note: Selecting On (Required Field) could have a negative effect on conversion.

Contact Telephone: On (Optional Field) On (Required Field) Off (PayPal recommends this option)

Change the setting here to On (Required Field) and Save

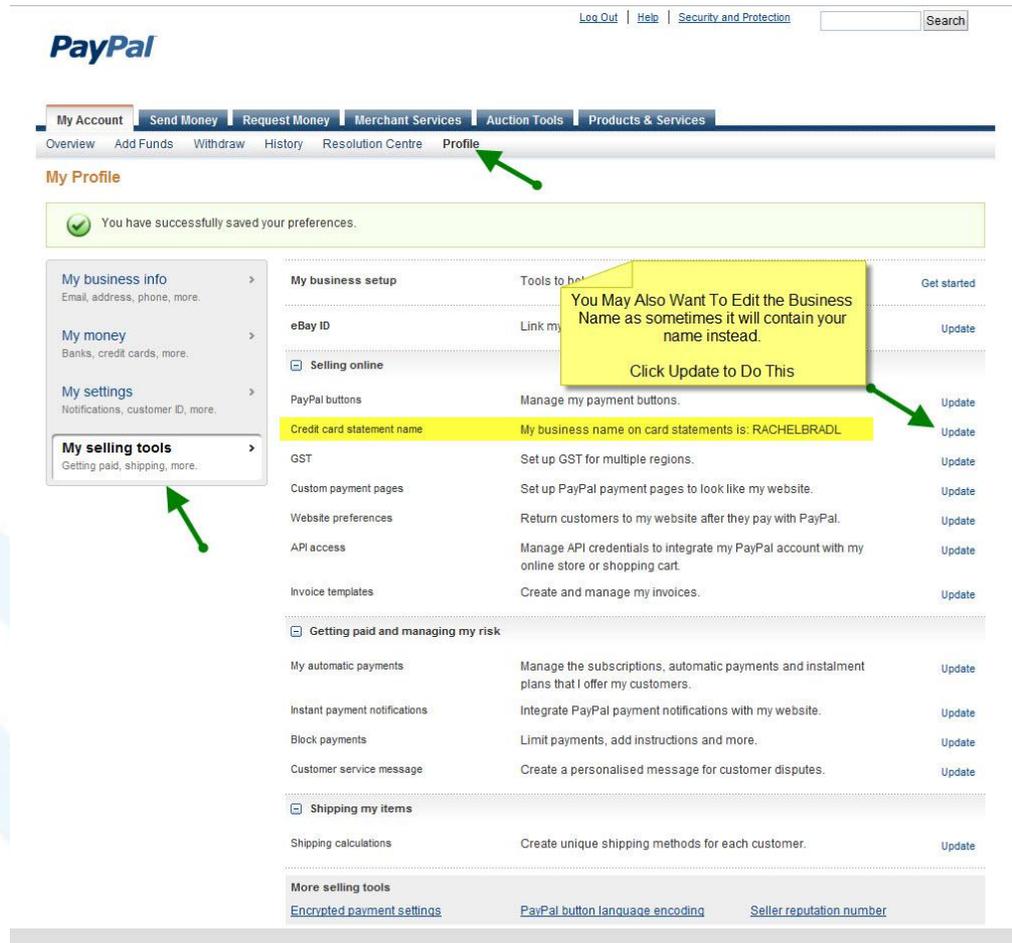

PayPal Express Checkout Settings

With this setting you determine if you technically support the German funding methods giro pay and bank transfer in your PayPal Express Checkout implementation.

Support giro pay and bank transfer payments: Yes No

Save Cancel

Also Check Name on Card Statement is Appropriate

The screenshot shows the PayPal 'My Profile' page. A green arrow points to the 'Profile' link in the top navigation bar. Another green arrow points to the 'My selling tools' section in the left sidebar. A yellow callout box with a green arrow pointing to the 'Credit card statement name' row contains the text: 'You May Also Want To Edit the Business Name as sometimes it will contain your name instead. Click Update to Do This'. The 'Credit card statement name' row is highlighted in yellow and shows 'My business name on card statements is: RACHELBRADL'. Other rows include 'My business setup', 'eBay ID', 'Selling online', 'GST', 'Custom payment pages', 'Website preferences', 'API access', 'Invoice templates', 'Getting paid and managing my risk', and 'Shipping my items'. At the bottom, there are links for 'Encrypted payment settings', 'PayPal button language encoding', and 'Seller reputation number'.

This button should now appear on your view cart page and also in your checkout when you have something in your cart.

If not - please contact GTP for support.

Click to test it.

To change the quantity of an item, alter the quantity in the quantity field and click the "update" link

To delete an item, click the "remove" link

To purchase your items, click "proceed to checkout", "checkout", "purchase" link or button

To continue shopping, click the "continue shopping" button or select a category from the menu

To review items in your cart click on the view cart button located on every page of this web site

Shipping costs are calculated at the checkout stage for delivery to one address only. If you want products delivered to more than one delivery address then please place separate orders.

Your second and subsequent orders will be faster as you can log in and have the checkout remember your billing details.

To view shipping costs, simply click on "checkout" to proceed to the order form and enter your delivery options. You will be shown any charges or special messages once you complete the shipping section

This Page Shows PayPal is Linked

Rachel Bradley

If you have successfully installed your API Credentials then you will get a business name and this page will load.

You cant pay yourself so get someone else to make a test purchase on your account. You can refund them easily. GTP can do this for you.
